DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 21 – 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. While applicant may be his or her own lexicographer, a term in a claim may not be given a meaning repugnant to the usual meaning of that term. See *In re Hill*, 161 F.2d 367, 73 USPQ 482 (CCPA 1947). The term "intellectual properties" in claims 21 and 22 is used by the claim to mean "circuit components," while the accepted meaning is "any intangible creations of the human intellect that are protected by law."

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 21 – 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Krolikowski et al.

Regarding claims 21 and 23, Krolikowski et al. discloses expressing a layout pattern of a circuit by using mask patterns prepared for plural circuit elements in figures 9A – 9C1 and column 11, lines 20 – 30.

Regarding claims 22 and 24, Krolikowski et al. discloses that each mask pattern has a mask for positioning, and the positioning is done by superposing one mark on another in figures 9A – 9C1 and column 11, lines 30 – 45.

Response to Arguments

6. Applicant's arguments filed 1/24/02 have been fully considered but they are not persuasive. Krolikowski et al. discloses arranging each mask pattern to form a layout pattern of a FET shown in figure 1. Figure 9c1 shows the superposition of alignment marks.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Inoue et al. teaches masking.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
